

# WHY PREFOLDS??

## WHAT ARE THE ADVANTAGES OF OUR ORGANIC COTTON PREFOLD DIAPERS?

Here at Bummi's we love all types of cloth diapers, but we especially love our Organic Cotton Prefolds.

Here's why:

- 100% soft, natural, organic fabric against baby's skin
- Very, very absorbent
- Easy to wash and quick to dry
- No stuffing required – just a quick fold, then place it in a wrap
- Customizable absorbency and fit – simply by folding!
- Less vulnerable to detergent and urine residue
- Less likely to retain odours
- Can be used with any type of wrap – you can try new prints, styles and fabrics whenever you like
- Very durable – plan to use them for more than one baby
- Versatile! Can be used as burp cloths, change pads, diaper inserts, etc., and they make great rags once you've finished diapering
- Organic cotton is hands-down the greenest and most sustainable choice in diapering fabrics
- A tried and true diapering option that is simple and convenient when used with flushable liners and contemporary wraps with snaps or hook & loop closures
- An affordable option that offers substantial long-term savings
